An innovative, proven and reliable system

Since the commercial deployment of the Aiton (France) - Orbassano (Italy) line in 2003 and the Bettembourg (Luxembourg) - Perpignan (France) line in 2007, the LOHR Railway System has proved its reliability and its performance in real operating conditions.

- More than 500 000 semi-trailers transported
- Approximately 250 000 km/year per wagon
- 1,2 million opening and closing cycles performed without incident
- 300 million truck-km saved on the road
- 300 000 tons of CO² saved

The LOHR Railway System is able to transport all types of road vehicles

Megatrailer

Container on semi-trailer
