• Multilohr

• Tale

• Solo

• SHR Confidential

• Maxilohr

• SRTC

RELEVANT SOLUTIONS

For more than 50 years, **Lohr** group has permanently adjusted itself to the customer's needs and requirements, as well as the automobile logistic evolution.

With a strong mind-set firmly directed towards innovation and constant customer feedback integration, the loading capacity, driver's friendly use and safety, reliability of the products have never stopped progressing and found themselves into our current range of products such as Eurolohr, Multilohr, CHR, Maxilohr, among many other.

50 years of continuous development

2000 team members worldwide

120 engineers and technicians in the research and development division

7 production sites on 3 different continents

15000 car-carriers operated daily around the globe

100 service points in Europe and 5 subsidiaries points in France - Russia - UK - Spain - South Africa

Our core businesses:

- **AUTOMOTIVE** : world leader in car-transporter vehicles, providing reliability, performance and longevity,
- **SERVICE**: technical assistance and spare parts network around the world,
- **RAILWAY SYSTEM**: european leader in road-rail transport technologies, for safe and economical transport of road semi-trailers on the European rail network,
- **NEW MOBILITIES**: major player in sustainable transport solutions for cleaner urban mobility, quieter and more digital,
- **DEFENCE & SECURITY**: leading player in the design-integration of defence systems and services and logistics materials.

Lohr Automotive is «the» car transport logistics specialist putting together the group of contributors and know-how dedicated to creation and sales of car carriers.

Our commitment is to optimise services and match the various vehicle transport requirements, through marketing new or used structures, assisting our customers with technical advices, personalized training and customised loading sketches.

More than ever focused on answering to the transporters needs for new concepts and vehicle transport systems, at short or longer terms.

Lohr Automotive is currently proposing a full range of vehicles positioning itself as a reference in the car transporter world in terms of:

Performance and reliability

Fuel consumption reduction and restraint of environmental and noise pollution

Driver's safety, ergonomics and road regulation

Know-how and product innovation

Driving and working time optimization

Control and anticipation of life time and operation cycles

Still, **Lohr** brings to transport logistics, not only innovation and products but more than that, **tangible solutions tailored to each customer's needs.**

For all these reasons, today and more than ever, **Lohr remains the undisputed world leader in the development and manufacturing of transport systems dedicated to automobile logistics.**

myLohr

Lohr introduces **myLOHR**, your gateway to efficiency.

myLOHR is a digital portal breaking all barriers between you and our Group, accessible whenever you want and wherever you are. Developed with and for you, it intends to facilitate your operations and our business relationships with more content, advice, applications, products, services, simplicity and clarity. **myLOHR** is soon going to be your operational dashboard to maximise your operations:
